EXHIBIT D

E-coli 0157:H7

A black and white micrograph showing numerous rod-shaped bacteria, identified as E-coli 0157:H7. The bacteria are scattered across the field of view. In the center-left, there is a prominent, larger, and more complex structure that appears to be a cell or a cluster of cells, possibly showing internal details or a different stage of the bacteria. The background is light and grainy, typical of a micrograph.
